

Bags & Covers

We supply every possible kind of bag or cover – from pallet covers to printed polythene bags – meeting all of your requirements.

As well as standard polythene, you can order our extensive range of bags and covers in the following materials:

Polylite

A 100% recyclable, tough, lightweight film that offers outstanding strength at lower gauges reducing the weight of polythene consumption and thus the cost by up to 20%. PolyLite bags and covers are usually supplied using a multi-layer co-extruded material that provides a thinner gauge with incredible strength.

Polyair

Eco-friendly polythene that is oxy-degradable in just 2–3 years. This material contains **d₂w**[®] additives that break down the carbon–carbon bonds within the polythene, leading to much faster deterioration than normal polythene.

Bags & Covers

Additives

Specialist additives and treatments

- Non fusion/Low fusion
- Micro/Macro perforated
- Embossed
- Non slip/Anti slip
- Anti static
- Corona treated
- Low melt

- UV stabilised
- Coloured
- Flame retardant
- Frost resistant

We offer a full range of polythene pallet covers manufactured to the highest standards, ensuring secure and protected pallet contents both in storage and transit. They have been designed for their strength and ease of application.

Our wide range of bags can be bottom-welded, side-welded, gusseted or flat. We also offer fold-over flap and self-adhesive strip bags, double welded and heavy-duty seal bags. They can be supplied unprinted or printed up to 8 colours. Competitively priced and printed to your specifications, they can be branded with your marketing message.

Samples are available and we offer a stock holding facility should you require a call-off service. We offer quotes by return, most products delivered within 24 hours, and great customer service at all times.

Send us your current polythene bag or liner specification and details of its application and we will recommend the best material to ensure you enjoy both cost and environmental savings.
